

Lord come

f                      am g f                      am g  
made in the image of a God who is great and wonderful  
f                      am g csus c f                      am g  
but now look at what we've done – rumors of war and tremors  
f                      am g f                      am g csus c  
shaking the earth, and suffering – oh that you won't tarry long

am                      f                      g  
we fix our eyes on the sky and we sing Lord come  
am                      f                      g  
we come alive with the light of the world in us  
am                      f                      g                      am  
from every tribe we'll be drawn to the brightness of our radiant king  
f                      g  
every nation will sing Lord come

f                      am g f                      am g  
made in the image of a God who is just and merciful  
f                      am g csus c f                      am g  
but now look what we've become – tolerant of injustice  
f                      am g am                      am g csus c  
not eager to feed the hungry ones - would you restore your kingdom God
